Cloud-Based Technical Training

PROJECT MANAGEMENT AND CONSULTING, LLC

[Project Management and Consulting, LLC \(PMC\)](#) is a professional services company specializing in business management services and consulting, program and project management & support, change management and organizational development, technical and tactical support, data & biometric conversion management and staffing, business process improvement & reengineering, construction management and services; and IT Cloud Technical consulting, products, and services. PMC is SBA 8(a) / SDB certified, and accredited by the Better Business Bureau.

[PMC](#) is a Virginia-based Minority-owned, Disadvantaged, and Small Business Enterprise (DBE/MBE/SWaM Vendor), as well as licensed and DBE/MBE/SBE certified in the States of Maryland, New York, and Washington. PMC is also MWAA LDBE certified, as well as, registered and licensed in the States of Indiana and West Virginia.

CLOUD TRAINING FOR IT ADMINISTRATORS AND END USERS

Training and certification on the use, maintenance, and monitoring of these cloud-based products is very important. PMC has teamed with the [Web Marketing Academy Organization](#) for this training specializing in certifications and accreditations on the BIG FOUR Platforms: Microsoft, Google, Yahoo, Facebook. Training in the areas that comprise “virtualization” is very important in today’s global economy. Agility is key for any organization’s strategic plan to keep up with the speed of business innovation and managing the projects to implement it.

The [Web Marketing Academy Organization](#) is a California-based Minority-Owned, SBE/WBE, Economically Disadvantaged Woman-Owned Small Business (EDWOSB).

IT MANAGED SERVICES

[PMC](#) provides an array of essential IT services including Desktop Care, Server Care, and Network Management on a flat rate subscription basis to the commercial, local, state, and federal government clients. We help minimize the cost of an on-premise IT Managed environment, which can be considerable over time.

PMC will help minimize the daily hassles involved with using and managing technology, so you can focus on your core mission and operating your business. Whether you already have technical staff or not, we can provide the expertise and training you need to optimize your IT environment for maximum efficiency and productivity.

PC SECURITY

[PMC](#) can provide PC security that can help you virtually manage and secure all of your users’ PCs. [PMC](#) can monitor users when they are in a remote office, working onsite, or on the road. [PMC](#) can also monitor and access desktop and mobile devices. We can set up your organization to receive alerts on updates, threats, and offline PC’s so that you can proactively identify and resolve problems. We safeguard PC’s from the latest threats and protect your confidential data with the newest innovative secure cloud-based software as a service (SaaS). All backed with a 99.9% uptime Service Level Agreement. Allowing you to:

- *Help your workstations be more secure
- *Enable true mobility within your business environment,
- *Monitor threats to your environment with low risk,
- *And Boost the productivity of your staff and IT Technicians

PMC, LLC – CLOUD CONSULTING

At PMC we help you with the planning and assessment of your current environment. You need to know if deploying virtualization into your environment is going to be an effective move for your organization.

Questions like: what is my ROI long-term and short-term? How long will this take? What is my downtime, if any? What will happen to the data that I currently have that must be maintained on-premise? How and when will the training be done? Is a pilot program possible?

PMC can answer all of these questions for you, and more. We also assist in preparing your organization for the deployment or migration of these services. We understand that there may be a combination of configurations (hybrid configurations) that may be used to accommodate your infrastructure's environment for a variety of reasons.

<h1>SaaS</h1>	<ul style="list-style-type: none"> · Software as a service · Operating environment largely irrelevant, fully functional applications provided, e.g. CRM, ERP, email
<h1>PaaS</h1>	<ul style="list-style-type: none"> · Platform as a service · Operating environment included, e.g. Windows/.NET, Linux/J2EE, applications of choice deployed
<h1>IaaS</h1>	<ul style="list-style-type: none"> · Infrastructure as a service · Virtual platform on which required operating environment and application are deployed · Includes storage as a service offerings

PMC, LLC.
CLOUD TRAINING
 PMC, in connection with the Web Marketing Academy Organization, will help to get your organization up to speed on the implementation and management of cloud-based products that have been introduced to your environment. What has proven true in most cases is that the training is most beneficial when administered *before* the introduction of virtualization into an organization.

Uniform training and certification of all of those in the IT environment has added to a much more developed and informed IT staff.

How can we help you today?
